

PUBLIC TRANSPARENCY REPORT

2023

Stichting Pensioenfonds Werk en (re)Integratie

Generated 15-12-2023

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2023 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2023 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Socially responsible investing pays off. Based on our social responsibility, we want to contribute to sustainability in the broad sense and specifically to climate improvement and balanced social relations (especially increasing employment opportunities for people with disabilities). In our view, socially responsible leads to a more robust portfolio with a better risk/return ratio. In our socially responsible investment policy, some themes receive extra attention. Because we consider them extra important. These themes are: 1) more employment opportunities for people who are vulnerable in the labor market, 2) climate improvement, and 3) social housing.

Our investment approach aims to have real world impact.

We are aware of limitations of any individual instrument; therefore, we deploy the full pallet of viable instruments. That is, active ownership, impact investing, screening, and exclusions. Exclusion being the option of last resort. We are proud of our innovative inclusion portfolio. PWRI is the pension fund for people with a vulnerable position in the labor market. We believe that everyone has a right to work. That is why we encourage listed companies to employ people who are vulnerable on the labor market. We invest a small part of our assets in companies that employ or want to employ these people. We call this our 'inclusion policy'.

Being vocal on socially responsible investing is important to lead by example and for SRI to gain momentum. Therefore, we have pledged to avoid financing greenhouse gas emissions with our investments in accordance with the Dutch Climate Commitment and the Paris Agreement. We have also pledged to avoid financing the tobacco industry.

In 2020, we signed the Investor Statement on Disability Inclusion. This is an investor statement for inclusiveness of people with vulnerable labor market positions. This is an international initiative. The goal is to encourage companies to employ more people with vulnerable labor market positions.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

We emphasize three themes with our socially responsible investment policy. These themes are climate improvement, more employment opportunities for people who are vulnerable in the labor market and building and making sustainable of rental housing in social housing.

With the Climate Agreement, the government wants to reduce greenhouse gas emissions significantly. CO2 is a well-known example of a greenhouse gas. The goal is that the earth warms up less quickly.

And no more than 1.5 degrees warmer. We want that too. That is why we signed the Climate Accord. We have three goals: 1) by 2050, we no longer finance greenhouse gas emissions with our investments, 2) by 2030, the greenhouse gas emissions we finance with our investments are half what they were in 2020, and 3) we will increasingly invest in climate solutions. To achieve these goals, we have created an action plan, which we are currently implementing.

Investing in companies is a great way to engage in conversation.

With the companies in our "inclusion portfolio," we engage in discussions about jobs for people with vulnerable positions in the labor market. These companies would like to employ these people. Most of the companies in our inclusion portfolio participate in the Social Business Performance Ladder (PSO). The PSO is a national standard for social entrepreneurship. We have 50 companies in our inclusion portfolio: 31 have a PSO label, the rest are in the process of or planning to obtain the quality mark.

In 2021, the board decided to invest in WSW loans.

These are loans to housing associations, intended for social housing construction. And for sustainability of social housing. WSW stands for Waarborgfonds Sociale Woningbouw. The board made this choice because many of our participants live in social housing. At the end of 2022, we were ready to invest. In early 2023, we invested in the first WSW loans.

In 2022, our asset manager spoke to 385 companies in 38 countries.

Those conversations covered topics such as climate change, sustainable food systems, biodiversity and fair wages. This had 142 results. An example of such a result is mining company BHP's decision to better protect biodiversity. Our asset manager also voted at 1,443 shareholder meetings. 19% of these votes were against the advice of the companies' boards. They were mainly votes against the composition of the board and against the remuneration of directors. Further, through the voting policy in 2022, our asset manager urged companies to contribute to reducing CO2 emissions.

In 2022, there were three companies where our discussions and voting policy had no effect. If this does not change, we will stop investing in these companies. At the end of 2022, we researched companies in which we do not want to invest in anyway. We excluded 174 companies. For example, because they have close ties to the Russian government. Furthermore, we mainly excluded companies that cooperate in the production and sale of tobacco or tobacco products. All investments in tobacco or tobacco products have now been sold.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We intend to continue the progress we have made in the last two to three years. We work closely together with our fiduciary manager who enables us to be an active owner. Working closely together we can continue our thematic approach without interfering with our intention of being an active owner. We intend to keep making progress with our action plan for the Climate Commitment and pushing forward with the inclusion policy.

How does your organisation ensure vote confirmation, i.e. that your votes have been cast and counted correctly?

The Active Ownership team at Columbia Threadneedle Investments is responsible for the execution of global proxy voting on behalf of reo® clients. Columbia Threadneedle Investments has a number of established controls to ensure voting is conducted in a timely manner through the daily review of the voting queue and a 4 eyes check which reviews execution is being done correctly in advance of all vote deadlines. Another control looks at a daily report which identifies votes that are not consistent with the established policy and a review is conducted to ensure the correct analysis has been completed.

The Proxy Voting Team, which is part of the Active Ownership team, conducts these voting controls to ensure the process and policies are followed routinely. Any exceptions in voting – which are inconsistent with the established policy - are escalated to the Proxy Voting team. A review is then conducted by Active Ownership team members with dedicated corporate governance expertise. and any exceptions to the policy are decided as necessary. The votes outside of the established policy are then completed by the Proxy Voting team.

There are routine reports which are generated by the proxy voting service provider (ISS) which are reviewed by the Proxy Voting Team to monitor votes are being counted and successfully submitted.

PGS 41.1	CORE	PGS 41	N/A	PUBLIC	Climate change	General

Does your organisation integrate climate-related risks and opportunities affecting your investments in its overall investment strategy, financial planning and (if relevant) products?

(A) Yes, our overall investment strategy, financial planning and (if relevant) products integrate climate-related risks and opportunities

Describe how climate-related risks and opportunities have affected or are expected to affect your investment strategy, financial planning and (if relevant) products:

Our three goals are: 1. By 2050, we finance zero greenhouse gas emissions with our investments. 2. By 2030, the greenhouse gas emissions we finance with our investments will be half. 3. We will increasingly invest in climate solutions.

Equities and corporate bonds first

We begin with stocks and corporate bonds.

Because these investments together represent nearly 45% of our total invested assets. Instead of the benchmarks, or "yardsticks," that investors usually use, we switch to special yardsticks: the 'EU low carbon benchmarks'. These special benchmarks help us to make our investments climate-friendly more quickly. We will make this switch in the first half of 2023. We stipulate in our agreements with the investment manager that the emissions of greenhouse gases that we finance with our equities and corporate bonds at any time must be 30% lower than that of the regular benchmark.

We also stipulate that greenhouse gas emissions must be at least 25% lower in 2025 than in 2020 and in 2030 at least 50% lower.

Then the other types of investments

Next, we move on to the other types of investments. Which type of investment we then start depends on several factors:- whether there are good measurements of greenhouse gas emissions- whether there are good methods for monitoring whether we achieve our goals- How large the assets invested in the type of investment are.

Ultimately, we can ensure that at least two-thirds of all our investments meet the agreements in the Climate Accord. For the rest of the portfolio this is not yet possible.

Supporting goals

In the comprehensive action plan, we have developed our three goals into smaller, supporting goals. These are for internal use and so we do not publish them.

It is an tool for the board to assess whether the implementation of our action plan is going well. For example, we want to have a certain percentage of investments in companies and governments and mortgage lenders that are working hard to reduce their emissions of greenhouse gases. Ideally, we then increase that percentage. If it is necessary and makes sense, we ask our investment manager to engage with such a company, as an active shareholder. Because we want our investments to have a positive influence on the "real world. So we would rather engage in dialogue than stop investing in companies.

This is called "engagement. The focus of our engagement is on companies with high greenhouse gas emissions have. We encourage these companies to reduce their emissions. So that they meet the requirements of the Climate Agreement. In doing so, we do not forget our social goals! We precisely want a socially just transition to a more climate-friendly economy.

Green investments

Since 2016, we have been investing in "green bonds" and "sustainability bonds.

These are bonds of companies or development banks or governments that invest the money they borrow in green, climate or sustainability projects. In recent years, we have invested more in these bonds.
